

15th May 2024

To the attention of:
To whom it may concern

Subject: color change of the pistons and caps of some syringes of our injectable medical devices.

Dear Sirs,

The undersigned Paolo Fattori, in quality of CEO of Tiss'You Srl, having its headquarters and production facility in 47895 Domagnano, Strada di Paderna, 2 - San Marino Republic (RSM),

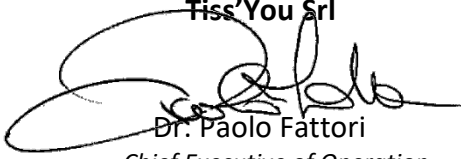

HEREBY DECLARES

that following prolonged delays in the supply chain of materials for the production of its injectable devices based on low-weight peptides from hydrolysed collagen, Tiss'You has agreed to receive from its qualified suppliers of syringes and caps, even those ones with different colours in order to avoid blockages or delays in the production.

It is therefore possible that for production runs between May and July 2024, Tiss'You injectable medical devices will feature syringes with a white instead of purple plunger and white instead of transparent cap.

Kind Regards.

Tiss'You Srl

Dr. Paolo Fattori
Chief Executive of Operation
